Agenda

- Warm Up!

- Functions

- Creating classes

- Constructors

- Inheritance

Warm Up!

Functions

Reusable code.

def funcname(params):
  .....

Creating Classes

Class NameClass (object):
def something():

....

Constructors

__init__ method

Called when an object is created.

Inheritance

```
In [1]: class Holler(object):
   ...:     def sayhi(self):
   ...:         print("Hi!")

In [2]: class Howl(Holler):
   ...:     def saywoof(self):
   ...:         print("Woof!")
```
